WebCritical chooses Softwired for High-Transaction Java Messaging

WebCritical Technologies, a leading industry player delivering full-service Java-based high performance web applications has selected Switzerland-based Softwired iBus//MessageServer and iBus//MessageBus products for its most demanding project due to their superior reliability and performance.

“After evaluating multiple products, we chose Softwired purely because of their ability to deliver the throughput we needed. No other company came close,” said WebCritical’s managing director of enterprise support solutions, Kevin Pirko. “Softwired understands our requirements and has been extremely responsive to our suggestions and needs. Having their consultants on-site has proven to be a great way of understanding and solving the issues.”

Martin Erzberger, Softwired director of engineering says: “iBus//MessageBus , the industries’ only high-performance JMS solution for IP MultiCast, combined with iBus//MessageServer is the perfect fit for the financial industry.” He explains that Softwired uses JMS IP MultiCast for data distribution with low latency and high throughput and combines all the capabilities of iBus//MessageServer for those messages which need persistence together with the right tools to keep the application ready for business 24x7.

more

Erzberger adds, because iBus solutions are 100% Java, they run on any Java Virtual Machine (JVM) from the smallest configuration through to the most powerful Sun Microsystems and Intel® systems. "Not only does iBus//MessageServer have the features that customers need, it comes with the support and consulting service offerings you would expect from a Swiss quality high-tech software company."

About Softwired

Softwired, based in Zurich, Switzerland is the leading supplier of highly scalable JMS technology for Intranet, Extranet and Internet and end-to-end wireless/embedded solutions. Customers include such leading organizations as eBay, UBS, the US Air Force, Xerox Corporation, Siemens, Swissair, Codexa, Northrop Grumman and LivePerson. iBus is used in a wide variety of applications from mobile application access, financial trading, telecommunications systems management, document distribution to the management of customer support sessions. Softwired is a privately held, venture capital funded company which can be contacted at: info@softwired-inc.com, +41 1 445 23 70 or on the web at: <http://www.softwired-inc.com>.
