IBM's J2ME Java Virtual Machine (J9) Now Enabled for Reliable Wireless Messaging By Softwired's iBus//Mobile.

**Softwired AG has added support of IBM's J9 Virtual Machine to its
market leading JMS iBus//Mobile middleware platform.**

Softwired's award winning iBus//Mobile middleware is uniquely designed to enable rapid development of interactive client/server applications for the wireless data market, enabling corporations to develop and deploy compelling mobile applications to Java enabled devices. iBus//Mobile offers rich end-user experience by supporting mobile Java applications that are highly interactive, user friendly, and which function reliably even when mobile devices lose network coverage. iBus//Mobile is the only true end-to-end JMS messaging middleware solution available on the market today.

IBM's J9 MIDP targets all operating systems including the Palm OS, who's licensed vendors are Palm Inc., Symbol Technologies, Handspring, IBM, HandEra, Kyocera, Samsung and Sony.

Targeted Devices include:

- IBM WorkPad PC
- HandEra 330 (TRG Pro)
- Kyocera Smartphone Series QCP™ 6035
- Samsung I300
- Sony CLIE
- Symbol SPT 1700

more

Dr. Silvano Maffeis, CTO of Softwired: "We are delighted about our iBus//Mobile solution for J9 from IBM incorporated through customer demand. iBus//Mobile is the only product available on the market for connecting Java-enabled devices (J2ME) to Java server applications (J2EE) by taking full advantage of the Java Message Service (JMS) standard and packet-oriented wireless networks such as GPRS and CDPD. Furthermore, companies can use their existing J2EE application servers (e.g., BEA WebLogic or IBM WebSphere) to deploy mobile services and connect to these services using Java enabled devices such as JavaPhones, Palm PDAs, and PocketPCs. Based on the standard JMS API, Softwired's iBus//Mobile is interoperable with every J2EE application server or JMS provider."

About Softwired

Softwired is the leading supplier of highly scalable JMS technology for Intranet, Extranet and Internet and end-to-end wireless/embedded solutions. iBus products are used in a wide variety of applications from financial trading, telecommunications systems management, document distribution to the management of customer support sessions.

iBus is a trademark of Softwired AG.

IBM is a trademark of IBM Corp. Other company and product names may be trademarks of the company with which they are associated.
