## CAPE CLEAR SOFTWARE AND SOFTWIRED PARTNER ON MOBILE WEB SERVICES DEVELOPMENT

**SAN MATEO, Calif. - October 09, 2002** - Cape Clear Software and Softwired today announced that they are partnering to offer a solution that will enable enterprises to create Web Services-based mobile solutions. The combination of Cape Clear's Web Services technology and Softwired's advanced mobile delivery platform provides a unique infrastructure offering for a new generation of standards-based applications, which can be distributed over various cellular infrastructure supporting the current 2.5G and forthcoming 3G networks.

"The arrival of powerful wireless devices coupled with the availability of improved bandwidth creates a huge opportunity for the creation of more complete mobile applications," commented Jørgen Thelin, chief architect at Cape Clear Software. "Web Services is the perfect mechanism for creating these composite applications. It supports existing IT systems while also facilitating the creation of new applications. When you couple that flexibility with the functionality offered by Softwired's iBus Mobile platform you have a complete mobile applications solution."

"Softwired has a proven track record in providing reliable, scalable, end-to-end messaging products, with a particular emphasis on the needs of the wireless market," says Mike Wilson, Director of Product Management at Softwired. "The arrival of Web Services has opened new opportunities for the building and deploying of mobile solutions. Our relationship with Cape Clear allows Softwired to provide the ideal mechanism for generating content and applications using our complete end-to-end messaging infrastructure."

### **About Softwired**

Softwired (<http://www.Softwired-inc.com>) is a leading infrastructure software technology firm that is developing and marketing its Java-compliant iBus JMS messaging products worldwide. Its customers and partners include many multinational firms and governments. The iBus is deployable as part of every inter-networked Java device from wireless PDAs, pagers, and mobile phones to personal computers, delivering information in real time and with guaranteed delivery. iBus has patents pending and is a trademark of Softwired.

### **About Cape Clear Software**

Cape Clear Software (<http://www.capeclear.com>) has one focus: creating Web Services technology that reduces the business costs of software development and integration. CapeConnect is a Web Services-based platform for enterprise integration that is simple, fast, and cost-effective to deploy and maintain. CapeStudio is an integrated Web Services development environment, simplifying the design, development, integration, and deployment of Web Services applications using XML, WSDL, and UDDI. Cape Clear's products link packaged business applications, such as ERP and CRM, and diverse technologies, such as Java, J2EE, CORBA, and Microsoft .NET, across intranets and the Internet. Founded in 1999, Cape Clear is a privately held firm with offices in Dublin, London, California, and Massachusetts.
